SUMMARY

Front-End Developer with 8+ years of commercial experience building e-commerce and enterprise web applications — from large-scale luxury retail platforms (childrensalon.com, vogacloset.com) to banking systems for Ukraine's state savings bank ([Oschadbank](https://oschadbank.com)). Strong in JavaScript (ES6+), TypeScript, React, Vue and Next.js, with hands-on platform migration and third-party integration experience. Early adopter of AI-assisted development (since 2022); in 2026 designed, built and launched a commercial Next.js 14 product end-to-end, including payments, analytics and Telegram automation.

SKILLS

- **Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3 / SCSS / LESS
- **Frameworks:** React, Next.js 14, Vue.js, Node.js, Knockout.js
- **E-commerce:** Magento 1 & 2, custom Symfony-based storefronts, PDP architecture, SEO & performance
- **Integrations:** REST APIs, MS Dynamics 365 XRM, payment providers (Stripe, Klarna, WayForPay), delivery & shipping APIs, Telegram Bot API, Cloudflare Workers, GA4
- **Workflow:** Git, Agile/Scrum, Netlify, AI-assisted development (Claude Code, GPT-based tooling)

WORK EXPERIENCE

Freelance Web Developer — Belgium (remote)

2026 – Present

- Delivered marinek.store — a commercial Next.js 14 landing site for a fitness coaching program: three pricing tiers, WayForPay payment integration, GA4 analytics, automated post-payment access delivery via Telegram; launched to production in July 2026.
- Built serverless payment webhooks (Cloudflare Workers) and Telegram bot automation for customer onboarding.
- Full ownership of the delivery cycle: requirements gathering with the client, design, implementation, launch and support, using an AI-assisted development workflow.

Hospitality roles — Center Parcs (Peer & De Vossemeren, Lommel, Belgium)

Mar 2025 – Present

Cook since Jun 2025, permanent contract since Jan 2026 — during family relocation to Belgium; freelance web development in parallel.

Middle JavaScript Developer — E-Consulting (Remote, Ukraine)

Oct 2022 – Jan 2024

- Worked on CRM systems for [Oschadbank](https://oschadbank.com) — Ukraine's state savings bank — building and customizing web resources for MS Dynamics 365 XRM in pure functional JavaScript.
- Developed a Vue.js electronic document-signing application for bank workflows (async request handling, response processing, canvas-based UI).
- Configured entity fields and integrated REST APIs in collaboration with back-end teams to ensure reliable data exchange.
- Introduced GPT-based tooling into daily development workflow (2022) — code generation, refactoring and debugging support.

Front-End Developer (Junior → Middle) — Ronis BT (Hybrid, Ukraine)

May 2019 – Sep 2022

- Core team member on childrensalon.com — one of the world's largest luxury children's fashion retailers — and vogacloset.com (MENA fashion marketplace).
- Rewrote the entire Product Detail Page front-end during a Magento 1.9 → custom Symfony re-platforming: migrated legacy jQuery to modular vanilla JS architecture, under senior mentorship.
- Integrated payment providers (Stripe, Klarna) and delivery/shipping services into checkout and order flows.
- Developed and maintained e-commerce features with Magento 1 & 2, React, Knockout.js; built reusable front-end components.
- Improved performance and SEO for high-traffic retail pages through resource optimization (asset loading, bundle size); built responsive transactional email templates.

Front-End Developer (in-house & freelance) — Kharkiv, Ukraine

2015 – 2019

- Started in a web studio with formal HTML/CSS training (2015), then delivered freelance projects: responsive websites with jQuery, Bootstrap, vanilla JS and PHP basics; exposure to .NET project structure.

EDUCATION

V.N. Karazin Kharkiv National University

2012 – 2015

Completed coursework in Computer Science

LANGUAGES

- **English** — B1 (working proficiency)
- **Dutch** — A2, certified (NT2 Level 1.2), actively improving
- **Ukrainian & Russian** — native
